

els unibond

self-etching adhesive

Light-curing, 1-component, self-etching adhesive to create a permanent bond free of marginal gaps between the dental hard tissue and light-curing filling / fixing material.

- HEMA-, TEGDMA- and BisGMA-free
- excellent bonding strength
- rapid and problem-free preparation at the patient's side
- suitable in combination with all etching techniques (non-etch, total-etch, selective etch, etc.)
